

BENEFITS OF A PERSONAL EXOSKELETON

Course Description: This 0.75 hour CEU course will introduce physical therapists and related professionals to personal exoskeletons for persons with spinal cord injury. The student will learn the benefits of these devices and why their patient may benefit. This course is hosted online and is not live.

Speaker: Joanna Weakley is a physical therapist with over 20 years of experience in both clinical and non-clinical settings. Clinically, Joanna's experience is largely working with patients with spinal cord injuries in both the inpatient and outpatient settings. While in clinic, she acted as a clinical instructor and integrated new programs and technologies into her facilities. In 2016, Joanna transitioned to becoming a non-clinical physical therapist, working for two leaders in exoskeleton technology. At these companies, her primary role has been educating physical therapists on how to use this technology in their own clinical practice. Joanna currently serves as a Clinical Manager at Ekso Bionics.

CONTINUING EDUCATION

This course has been approved for PTs and PTAs for **0.75** contact hours.

Ekso Bionics Inc. is a licensed CE Sponsor of the Illinois Department of Financial and Professional Regulation (#216.000393), a rule-approved CE provider of the PT Board of Florida (#50-45580) and has been approved as a provider of continuing education for Physical Therapists and Physical Therapist Assistants in California (CA) by Redefine Health Education, a recognized approval agency of the Physical Therapy Board of CA.

In addition to the approvals noted above, the teal states on this map are likely to accept courses approved by other state boards pursuant to regulation. As regulations may change over time, please confirm current accuracy with your state board, eg. that they will accept courses approved by other state boards.
