LIVE WEBINAR

The Future Of Next Gen Payments On DLT

- Payments on DLT is not just about tokens and cryptos.
- Integrating digitally native DLT networks with existing payments infrastructure is a great way forward to bridge the gap.
- Open banking is a key lever underpinning the interoperability of DLT with existing payments schemes.

A few housekeeping tips

Use the **Q&A** tab to ask your questions

Rapid evolution of new payments services providers and their products: How do you see the payments paradigm changing?

Where does DLT fit in?

How do you differentiate yourselves in the market to compete with other PSPs?

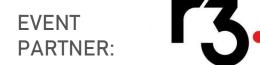

Tell us more about the new age infrastructure being built on DLT.

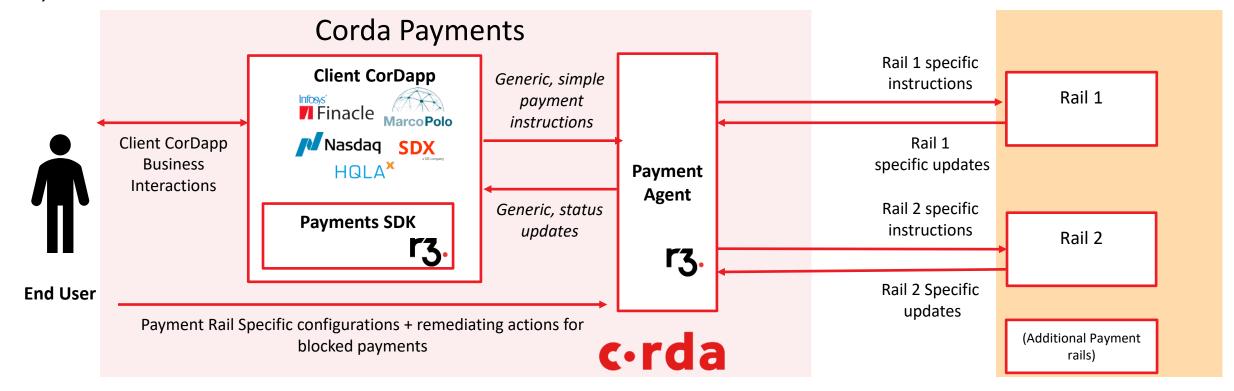

How to build a bridge between the existing and the new world?

Corda Payments integrated with Mastercard rails

Integrate global payment rails with **Corda Payments (Payments SDK + Payment Agent)**, enabling quick and easy settlement for Corda-based Ecosystems.

Benefits

For developers

A universal means by which developers can integrate payments into their own CorDapps effortlessly

For end-users

Futureproofed access to real-time payments from within their CorDapp solutions, DvP and more

For networks and service providers

A new service offering, additional added value for networks, new revenue line

How does Modulr play a role in this arrangement?

How would it be a facilitator in this?

We're delivering the complete service for digital accounts and automated payments

Bottomline

- A combination of existing payments infrastructures and DLT transformation is going to yield significant results for streamlining payments.
- This will continue to evolve as CBDCs and digital currencies become more widely used in the enterprise context.
