What you get in this short course

Welcome! and thanks for registering for the *Mapping Short Course*.

This area is called your 'dashboard' - information and supporting resources about your course will be posted here.

Here's what is in your short course

The short course program intends to support your development of best-practice mapping skills by offering:

A live webinar where your instructor will show the:

- reasons for a logically designed assessment mapping document filled with precise, accurate data
- links to compliance requirements and your RTO's Quality System
- mindset for making decisions about where to plot data
- steps to create the desired end product

A recording of the live webinar

Access to this learning area where you can:

- talk with others in the course using the discussion board
- see examples of key reminders
- test your understanding with quiz activities

A chance to seek feedback on your work

MARK INCOMPLETE CONTINUE →

The 'continue' button will move you through all of the course sections

6. Work your way through each part of the course by clicking on the chapters shown in the left-hand navigation menu
These sections will show any underlying information and content such as any handouts if provided
