MAPPING CPPWMT3001 IDENTIFY AND SEGREGATE WASTE

Application	This unit specifies the skills and knowledge required to identify waste types and segregate according to waste pathways. It includes inspecting waste to identify and segregate waste types and managing hazardous and non-conforming wastes. It also includes monitoring waste storage containers or areas to ensure adequate available storage capacity, secure waste containment and quality control. A person who achieves this unit of competency is expected to take responsibility for completing these tasks with a high degree of self-direction.

Element	Performance criteria	Assessment Tasks		
		Knowledge Test	SDS	Workplace Observation
1. Prepare to identify and segregate waste	1.1 Review job schedule to confirm work activities for identifying and segregating waste and clarify issues with relevant persons.			✓
	1.2 Review workplace policies and procedures and work health and safety (WHS) requirements for waste identification and segregation and apply to work tasks.			✓
	1.3 Identify and obtain plant and equipment required for waste segregation and check to confirm they are fit for purpose.	21		✓
	1.4 Set up segregation containers or areas and check to confirm suitability and capacity to meet segregation requirements.	22		✓
	1.5 Select, check and use personal protective equipment appropriate for work activities.	12		✓
	1.6 Identify hazards and risks associated with work activities and implement required controls according to workplace WHS requirements.	7,8,9,10		✓
	1.7 Review and follow safety data sheets (SDSs) for hazardous waste to be segregated.		All	✓
2. Inspect and identify waste types	2.1 Inspect waste following workplace procedures.			✓
	2.2 Identify and record waste types including hazardous and non-hazardous waste.	15, 16, 23		✓
	2.3 Identify and record non-conforming waste types according to workplace requirements.	17, 23	1	✓
3. Segregate waste	3.1 Segregate waste according to waste types and workplace requirements.			✓
	3.2 Manage hazardous and non-hazardous waste following workplace procedures and SDS.		3,4,5	✓
	3.3 Place segregated waste into fit-for-purpose containers or areas.	24		✓
