Bitcoin and regulatory issues

Description

The progressive **institutional legitimization** of Bitcoin has clearly accelerated some of **the regulatory processes** underway, which find their first comprehensive application in **the European MiCA Regulation** and see a still rather fluid situation in **the United States**, although apparently more favorable. At the same time, the Module also addresses the situation in **Switzerland** and other important **jurisdictions** and explores the application of **the MiCA Regulation**.

Duration: 2.5h

Methodology: e-learning and live webinar

Contents

Regulatory aspects (90')
