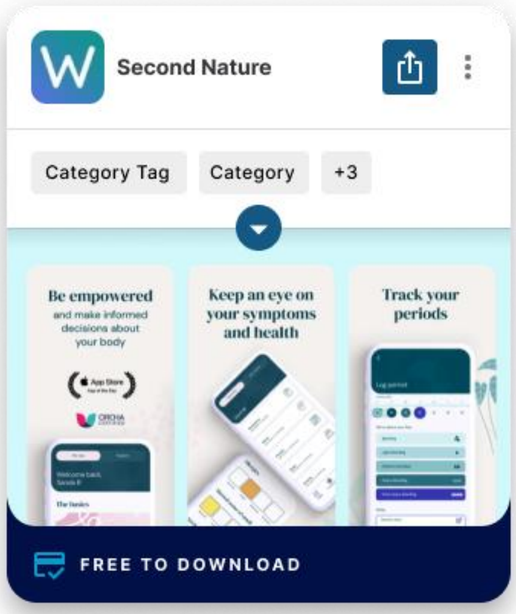
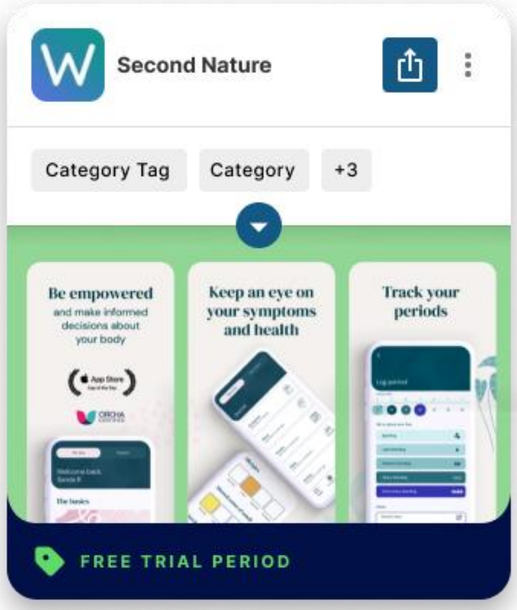
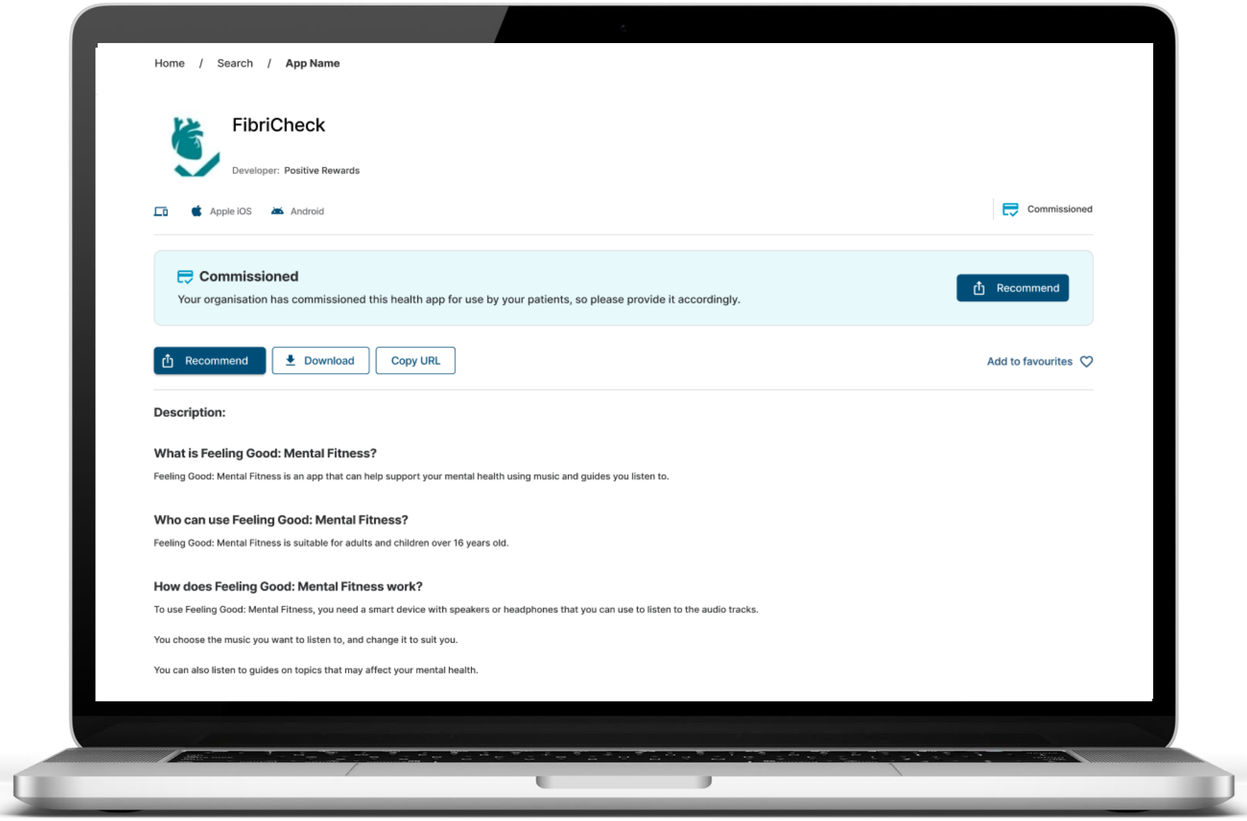
ORCHA Activate – Commissioned App and Promotions

ORCHA ACTIVATE

Health Systems can deploy pre-commissioned apps and promotions to their patients.







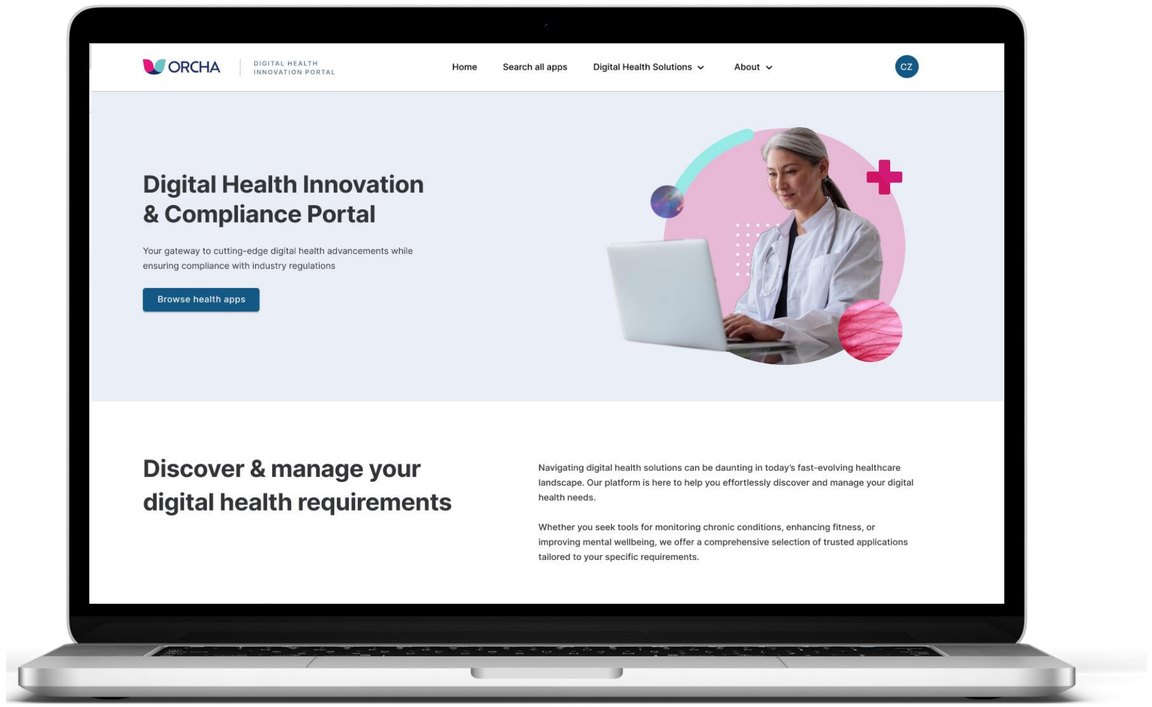
ORCHA Assure – Digital Health Innovation Portal

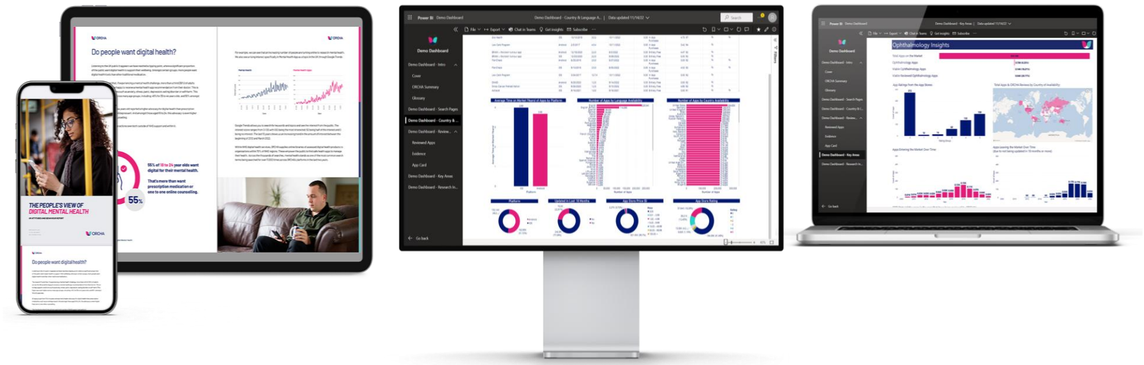
ORCHA ASSURE ORCHA INSIGHT

For Health System Commissioners, looking for solutions to their health system challenges, discover safe digital innovations that can be easily mobilized for distribution.

For Health System Compliance Officers looking to understand if an innovation meets the standards necessary to safely deploy the technology.

Digital Health Innovation Portal





Sussex & System One Integration

Aim: To equip healthcare professionals with the ability to recommend trusted health apps directly to patients via the System One Portal

Sussex Community NHS Foundation Trust

Collaboration

The integration has been a collaborative process between the trust and ORCHA to ensure we were able to meet all user needs while maintaining data and security compliance.

Development and Testing

The trust coordinated the testing phase, including automated tests and user acceptance testing with clinicians. Rigorous security testing ensured compliance with GDPR and other regulations. This approach ensured a robust, secure, and user-friendly integration.

Sussex & System One Integration

Aim: To equip healthcare professionals with the ability to recommend trusted health apps directly to patients via the System One Portal

Sussex Community NHS Foundation Trust

Outcomes

Enhanced Patient Engagement: Healthcare professionals can now recommend personalised health apps during consultations, encouraging patients to take a more active role in managing their health.

•**Improved Workflow Efficiency:** The seamless integration means that professionals do not need to leave the System One portal, saving time and reducing administrative burdens
