

NEW COURSE AVAILABLE

Complex Trauma and Attachment in Children

Facilitated by Trent Savill from Complex Care

This new course has been designed for anyone supporting vulnerable children and families who have been exposed to trauma, and provides all the crucial information required to engage traumatised children and provide them with the experiences they require to heal and develop.

MODULES INCLUDE:

- Defining trauma with basic brain anatomy
- Response to threat
- Neurobiology of trauma
- Basics of attachment
- Intersubjectivity, empathy and self regulation
- Creating safety and repairing the brain stem
- Re-building healthy attachment
- Collaborative problem solving
- Supporting a child through an escalation
