Crypto training

SCIENTIFIC COMMITTEE

Maurizio Camponovo. Born in 1971, studies in Psychology and Human Resources Management, has been Human Resources Management Manager and Training&Development Manager in leading Swiss banks, Member of the International Training&Development Committee of Generali Group, Member of the Executive Education Advisory Board of the Swiss Finance Institute and Member of the Training Commission of the Swiss Bankers Association. In 2014, he founded MFG Consulting SA and in 2021 he started the **Route Crypto Training©** project.

Lars Schlihting. A lawyer with expertise in blockchain and crypto assets, former partner at KPMG and Kellerhals Carrard, he founded Lexify. An expert in legal, taxation and new technologies, particularly blockchain, Lars supports financial firms in the difficult challenge introduced by the digital revolution. His major expertise includes Token Offering management and the use of cryptocurrencies and tokens in business operations.

Alessandro Fré. After more than 20 years of experience in the training field, he now works mainly in consulting, reorganization and business revitalization of companies. He has designed and conducted more than 800 training and consulting interventions with innovative methodologies and worked with more than 150 leading Italian companies. He has supervised and follows numerous projects in the areas of sales, trade, management and train-the-trainer.

Luca Boiardi. A biomedical engineer, born in 1989, in 2017 he became interested in the world of digital finance and opened a virtual community that grew exponentially. In 2021 he founded The Crypto Gateway srl, which manages the community and offers training and consulting services. Expert in Blockchain, Decentralized Finance, Fundamental Analysis of Digital Assets and Tokenomics. Author of "Investing in Bitcoin and Cryptocurrencies" HOEPLI editions.

Alberto Borri. He provides legal assistance mainly in Blockchain, Crypto assets, Anti-Money Laundering and banking and financial regulation in Switzerland, Italy and Europe. After graduating in law, Alberto worked at PwC's Financial Regulation team and later at Kellerhals Carrard firm. He gained particular experience in fintech regulation, particularly in relation to projects involving crypto assets, tokenization of financial instruments and blockchain.

Gabriele Gentile. Born in 1979, he furthered his university education in finance before taking his first steps in banking. Over the past 15 years, he has distinguished himself as co-founder and asset manager of various companies in Switzerland, Monaco, and Mauritius. Since 2020, his passion has been digital finance, managing dedicated products and discretionary mandates for private clients. He loves being at the forefront of probing the unexplored territory of digital finance.

Andrea Accatino. After obtaining my high school diploma in science, I graduated in Languages & Economics from the Catholic University of Milan. I started working at BNP Paribas in Milan, in the Local Custody team, which allowed me to get closer to the world of finance and develop a passion for the markets. After three years at the bank, I decided to resume my studies and obtained a Master's degree in Corporate Finance from SDA Bocconi. This was an invaluable learning experience that helped me build a more solid foundation in finance and prepared me to re-enter the world of work with a more specialized profile. In 2018, I joined Brightside Capital, a multi-family office based in Lugano that manages the financial assets of entrepreneurial families, with a strong focus on investment and financial education, as an analyst. Meanwhile, since 2020, I have been passionate about the world of digital assets and have been trying to build up my knowledge base by listening to numerous podcasts and interviews, as well as participating in an online master's program at MIT in Boston on the world of blockchain.
