SwiftAction™ Training Program

2026 Cargo Securing CIC – Course Coverage

Port State Control inspections increasingly focus on how requirements are applied in practice, not simply whether documentation exists. Under the 2026 Cargo Securing Concentrated Inspection Campaign, inspectors will assess the correct use of the Cargo Securing Manual, the physical condition and suitability of securing arrangements, stability assumptions, voyage monitoring, and crew competence. SwiftAction™ aligns training directly with inspection behavior and PSC deficiency logic, supporting inspection readiness, post-inspection corrective action, and defensible due diligence under the ISM Code.
